

Peli Lights - SabreLite 2000 series

Compact and powerful torches for use in locations with extreme temperatures and chemicals

Submersible 

Submersible 

SabreLite™ 2000

This powerful torch was designed with one big goal: SAFETY. The SabreLite 2000 carries more approvals than any other torch on the market today making it extremely safe. The SabreLite is o-ring sealed with a twist on/off lens shroud and comes with a polarity battery guard tray that safeguards against dangerous "outgassing" of hydrogen from an accidentally reversed cell. It is powered by 3 C alkaline cells, submersible to 150 meters, and has an ABS resin body which resists chemicals, corrosion, and extreme temperatures. Unlike ordinary torches with yellowish beams, the SabreLite's incredibly bright Xenon lamp produces a powerful collimated white beam of light. Peli's SabreLite is the leader in quality and performance.

SabreLite™ 2000 Zone 1

Same features as the SabreLite™ 2000 above but with static-dissipation materials body. SabreLite™ 2000Z1 is ATEX certified safe for use in hazardous Zone 1 (Category 2) locations, and is perfect for professionals who work in areas with high risk of explosion such as chemical, pharmaceutical, power, oil and gas, and fire rescue.
