

Insulated immersion suit

Immersion suit non-pillow type for life saving use in cold environments

Lotek - Insulated immersion suit - 080515

This immersion suit is designed to be a part of the onboard safety at cargo ships, fishing vessels, passenger ships and offshore personnel. The insulated suit may save your life in case of an emergency.

The suit will withstand water temperatures down to 0 degrees centigrade for a prolonged period of time, meaning that you may well survive several hours in cold water. Under normal circumstances the body temperature will drop to below 35 degrees centigrade within a few minutes, but the immersion suit may save your life.
